

Inventory Settings

The table below provides an overview of the site admin settings that control the behaviour of inventory in AroFlo Office and Field.

Setting	Description
SOR List Price Levels	Set up pricing levels for SOR lists.
Item Price Levels	Set up pricing levels for inventory items.
Inventory Movement Linked to User's Business Unit	Check this box to link inventory movement to a user's origin business unit, instead of the business unit the user is in when they book out materials.
Show Stock Levels in Field	Check this box to allow Field users to see current stock levels when booking materials on tasks.
Track Inventory on Sales Invoices	Check this box if you want to track stock levels of inventory items added to Sales Invoices.
